Want a simpler way to connect to meetings when you're on the go? Or do you need an easier way to organize the dial-in numbers and passcodes for several different meetings? Now Mobile Assistant, a free* service from InterCall, gives you one-touch dialing into your conferences from your mobile phone.

It's a situation most of us have experienced—you need to attend a meeting when you are not able to be in a traditional 'office' setting. Whether you're heading to another meeting, don't have access to a landline phone or are called out of the office unexpectedly, you need to join the meeting and need to do it while you're on the road. InterCall's latest innovation allows you to access a conference call with the click of a single button on your mobile phone.

Conferencing for a Mobile World

If you are a frequent traveler or often join meetings while out of the office, InterCall's Mobile Assistant is an easy-to-use solution that will keep you connected.

- + Support for numerous phones with more to come.
- + Store up to 256 unique sets of audio conference details—from weekly, recurring meetings to one time calls you need to attend while mobile.
- + Start and join InterCall audio conferences with the push of a single button. You no longer need to enter your ten-digit dial-in number, conference code and leader PIN. In addition, store your security passcode in select mobile phones.
- + Join audio conferences as a participant or a leader. You indicate the details when creating the profiles.
